

Key features:

- ▶ Adaptor for permanent installations
- ▶ Connects directly to the haze machine without the need of modifications.
- ▶ The adaptor connects to the machine's bag-in-box spot connector and can easily be disconnected
- ▶ Allows 25 L fluid canisters to be connected to the machine, for permanent installations.
- ▶ Reduces fluid change intervals, especially when the machine is used continuously.
- ▶ All connectors are equipped with disconnection valves, prevents the fluid from leaking when the tube is connected or disconnected.
- ▶ Air inlet check valve lets air into the canister while fluid is consumed, prevents fluid from leaking out if the canister is tilted.
- ▶ Cap foam sealant gasket & all connectors with O-rings for a completely sealed fluid environment.
- ▶ Suction assembly filter, replaceable.
- ▶ All parts in contact with fluid made with corrosion & chemical-resistant materials for long life.

Applications:

- ▶ Permanent installations in theme parks, stages, theatres, museums, restaurants etc.
- ▶ Compatible with all Swefog fog generators using water-based liquid & CMB bag-in-box connector.

The adaptor simplifies a fast connection to 25 L canister in permanent installations, for an oxygen & dust-free connection of the fluid canister.

Specifications:

Model no & versions:	SP121 Adaptor BiB to CAN 25 L
Production years:	2022 --
Made for:	Water-based fog fluid
Compatible with:	Swefog 25L canisters & All Swefog fog generators made for bag-in-box containers, equipped with Swefog CMB connector. The adaptor's male connector fits with the machine's connector.
Compatible fog generators:	40510230 Swefog K1 hazer – all versions 40420230 Swefog Duramax X3 intellahazer – all versions 40302230 Swefog Duramax intellahazer 1k8 – all versions
Length of connection hose:	Between machine → fluid canister = 1,000 mm / 3.3 ft
Location of production:	Filipstad south assembly plant, Sweden
Shelf life:	Min. 5 years
Additional information:	Contact manufacturer for technical questions
