# SnakeSys Control Environment

SnakeSys Control Environment is an all in one control solution for architectural and show lighting systems. It enables multiple control elements to respond to system wide triggers that affect the DMX outputs of MagicQ consoles, QuickQ consoles and SnakeSys nodes.

SnakeSys products are designed to run 24/7 providing a reliable solution for installations. Combining software and hardware the SnakeSys control environment offers a scalable system for installations.

SnakeSys 10Scene Wall Plates

A simple wall mount plate that fits into standard US, EU and UK back boxes, providing 10 buttons each with dual colour LED status indication.

SnakeSys 10Scene Gateway

10Scene Gateway is the interface between 10Scene wall plates and MagicQ/QuickQ consoles. It converts from Network to 10Scene protocol and provides power to the connected 10Scene wall plates in the system.

Features

- Two 10Scene wall plate Phoenix ports
- Connection for up to 20 wall plates
- Two Remote inputs
- One Network port

10Scene Gateway is the interface between 10Scene wall plates and MagicQ/QuickQ consoles. It converts from Network to 10Scene protocol and provides power to the connected 10Scene wall plates in the system.

Features

- Simple 4 wire system
- Can be connected together using standard Cat 5E cable
- Connect direct to QuickQ Rack, no power injectors required.
- Easy to daisy chain – up to ten 10Scene wall plates per chain
- Long distance – one 10Scene at 1000 metres or five 10Scenes in a chain at 300m

10Scene Remote App

Available on iOS and Android, 10Scene Remote App enables simple control of the SnakeSys Control Environment. The app provides control of the 10 buttons found on the QuickQ Rack and other SnakeSys control products, such as 10Scene wall plates.
